

## Marine Graphics Ink

Marine Graphics Ink is owned and run by Nick Hannan. He has been designing and crafting custom made graphic art in Australia and the Pacific for almost 20 years, using a wide range of techniques encompassing digitally generated graphics, airbrush, oil paint, and water-colour to create his wonderful images.

With a lifetime of experience on the water and around boats, Nick's passion for the ocean has given him an intimate knowledge of the sea that feeds the nature of Marine Graphics Ink.

Whether it be a simple name or illustration to personalise your vessel, or more complex graphics, such as digitally generated vinyl wraps and scenes airbrushed around the entire hull, Nick will customise the designs on your boat to your specifications, making it uniquely yours. If you are a recreational boater or a commercial concern, all your visual needs are catered for with Marine Graphics Ink.

Custom artworks of fish and the world they live in are Nicks specialty. Oil paintings on canvas to adorn the walls of your home or business. Digitally drawn images for all commercial applications, from small designs, logo's and fish, through to high resolution images for large printing purposes.

When we first saw Nick's work we were amazed, and actually stumbled across it on youtube whilst surfing the net. The quality of the drawing and technical knowledge required to create such fantastic images (the Bream is our absolute favourite) cannot be underestimated. On seeing this special work we had to contact Nick and offer him a place on Palmfishing, as we felt our membership would love to share in the quality that is Marine Graphics Ink.
