

Tuf Line Dura Cast

Dura Cast

TUF-Line® DuraCast is the best choice in spinning reel line. TUF-Line® DuraCast's perfectly round cross section and subtle body eliminates wind knots and tip wraps while allowing the line to flow fluidly through rod guides for exceptional distance with virtually no rod guide noise. TUF-Line® DuraCast's Tri-Axial, bi-component construction ensures long wearing durability, permanent coloration, and unparalleled abrasion resistance.

Dura Cast Wins!: Best New Braided Line, EFFTEX 2009

TUF-Line Dura Cast is the braid solution for spinning reels. Its revolutionary patent-pending construction process eliminates tip wraps, wind knots, rod guide noise and common bail trip issues associated with standard superlines, yet delivers the strength and sensitivity advantages anglers have come to rely on. So outstanding is Dura Cast's performance that the line won the Best New Braided Line award at the prestigious European Fishing Tackle Trade Association show in June of 2009. Dura Cast's award is only the second time in history a U.S. manufacturer has been the recipient of the honor.
